ABOUT THE FUND

Founded in 2011 with an initial \$100,000 endowment, The Weatherhead Fund has grown into the premier undergraduate, student-run investment organization at Case Western Reserve University, now managing nearly \$1,400,000 of the University's endowment. The Fund provides a high-impact professional setting where students bridge the gap between academic theory and real-world capital markets through active portfolio management. Members are organized into specialized sector verticals, which cultivates depth in financial modeling, equity research, and credit analysis. Beyond managing capital, the organization serves as a professional hub, connecting students with a global network of alumni and leading financial institutions through recruiter events and speaker series.

OUR MISSION

The mission of The Weatherhead Fund is to cultivate the next generation of finance leaders by providing unparalleled hands-on experience in investment management and financial analysis. We are dedicated to empowering undergraduate students with the technical proficiency and professional intuition required to navigate complex global markets. By fostering a collaborative community of high-achieving individuals, we strive to:

- Educate: Provide rigorous training in valuation methodologies and market analysis.
- Empower: Entrust students with the fiduciary responsibility of managing a significant portion of the University's endowment
- Connect: Bridge the gap from campus to Wall Street and other leading financial hubs worldwide by facilitating meaningful engagement with alumni and industry recruiters.
